Before the installation, please check the package of content.

- TV BOX main unit X 1
- Plastic Stand X 1
- Remote Control X 1
- HD-15 VGA Cable X 1
- 3.5mm Stereo Audio Cable X 1
- AC-DC Adaptor X 1 (Please check the AC Voltage)

Main Unit

Plastic Stand

Remote Control

VGA Cable

Audio Cable

AC/DC Adaptor

# ABOUT THE TV BOX

**\*For the best performance of this product, we strongly recommend you to read this operation manual thoroughly and keep this manual properly for further reference**

## **Preface:**

The imaging method of the CRT or LCD monitor is quite different from the traditional TV Set. CRT or LCD uses the non-interlace method to form a full screen. But the TV set uses interlacing method. So it is apparently that the LCD or CRT Monitor is better for long time viewing. And CRT or LCD has higher resolution than TV Set. Traditional TV Set has limited resolution (Horizontal Line), CRT or LCD can have more than twice or triple resolutions. Now here comes a super TV Box, can let your CRT or LCD become a second TV set with higher picture quality and stable operation.

## **Features:**

- Plug 'n' Play: no software required
- Stand alone external TV tuner box for those TV's, HDTV's or video monitor without TV tuners built in.
- Great demodulator for converting coaxial cable TV signals into RCA video and stereo audio outputs for TV, video recorders, A/V receivers, wireless transmitter kit, etc.
- Excellent video to VGA converter for converting video signals into progressive scan type for high definition video quality.
- Full Channel, PAL system.
- 7 different resolutions: 800x600 , 1024x768 , 1280x1024 , 1366x768 , 1440x900 , 1600x1200 , 1920x1080 , 1920x1200 , 1680x1050 , 2048x1152
- Stylish Design, with Stand, can place upright or horizontal.
- Full-function remote control
- 1 AV and S-Video connectors on the front panel, meet the daily operation
- Adjustable TV function: brightness, hue, color ..etc
- Auto-Scan function: never miss the channel
- Audio in and out
- VGA In and Out

## **Application:**

- With LCD, your LCD will become a LCD TV
- With CRT Monitor, you will have an Excellent TV Set
- You can play TV Game on your monitor or LCD
- You can make your monitor become a home entertainment center
- You can make your monitor to become a security monitor

# SPECIFICATION

Item	Specification
CATV/TV Input	75 Ohm F female or IEC female
Frequency range	48~862MHz
Video Input	Video, S-Video
Audio Input (Signal Source)	Stereo RCA Left, Right
Audio Input (PC)	3.5mm Stereo
VGA In	HD-15 Female
Power- AC/DC adaptor	5 VDC 1A UL-listed for USA, CE certified for Europe
VGA Output	HD-15 Female
resolution	800*600 60/75Hz 1024*768 60/75Hz 1280*1024 60/75Hz 1366*768 60Hz 1440*900 60Hz 1600*1200 60Hz 1680*1050 60Hz 1920x1080 60Hz 1920*1200 60Hz 2048x1152 60Hz
Audio Output	3.5 mm Stereo
Video Output	RCA jacket
Regulatory specification: Complies with requirements of:	FCC 15.225 FCC Part 15-Class B ICES-003 CE, RoHS

\*Specification subject to change without further notice

# TROUBLE SHOOTING

## 1.No picture

- a. The connection could be not correct, please contrast the connection with illustration.
- b. Check the power plug whether it is firmly connected and the supplied voltage meets the adapter rating.
- c. Make sure that the selected mode is the same as input signal, and then perform AUTO SCAN again.  
( For example : under "AIR TV " mode, the F connector has to be connected with UHF/ VHF antenna. Under "CATV" mode, the F connector has to be connected to CATV system.)

## 2. No sound

The connection could be not correct, please contrast the connection with illustration.

## 3. TV BOX has no response while using remote controller

- a. Make sure that you are pointing to the IR sensor window of TV BOX within 6 M, and +/- 15 degrees.
- b. Please check the batteries and replace with new one if necessary.

\*\*\*\*\*  
**The standard of VGA signal output from this unit TV BOX is identical to general PC VGA display card, so the use of this unit will not violate the warranty of LCD or CRT monitor.**

# USER INFORMATION

This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction may cause harmful interference to radio communication,. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help
