If you are running a cable 15 metres or more, make sure you use a SOLID CAT5E/6 cable. This product may not work with standard stranded ethernet cable. See related items for cabling that will work this product.

50m distance has been tested fine on F/UTP solid cat6 cable.

FYI: Most of the pre-made CAT5E/6 leads on the market are stranded cable not solid.

Please note: 50M distance is under perfect transmission conditions including straight cable runs with no bends, kinks, electrical interference, patch panels or wall outlets.
